- ✓ Cure full hand for 30 seconds SOFT in the SMART Light
- ✓ Remove sticky layer with non-acetone polish remover

GOOD TO KNOW

DO NOT BUILD THE NAIL WITH BCOLOUR

BCOLOUR is an ultra-pigmented colour gel that requires thin-layer application for proper curing and is therefore not intended for building up the nails.

THE BEST GLOSS TO USE IS BFLEX OR BSTRONG

The most compatible gloss to use with BCOLOUR is BFLEX or BSTRONG. Simply use the same bottle of BFLEX or BSTRONG that you used to build the nail. This allows you to work with just one bottle and BCOLOUR. Always remember to cure your BFLEX or BSTRONG in 30 Seconds soft, also as a gloss layer.
